

# 1st birthday card

Time to make

Difficulty level

Pritt Craft-It is a comprehensive range of adhesives developed specifically for craft projects. Let your imagination run wild and your creative juices flow with the help of Pritt Craft-It. Have Fun!

### What you will need:

#### Pritt products

- Foam Mounting Pads
- Glue Stick
- PVA Glue
- Permanent Glue Roller

#### Materials

- Coloured card
- Wrapping paper
- Pencil
- Craft knife
- Ruler
- Baby photos
- Small beads

1. Fold a rectangular piece of card in half.
2. On your chosen wrapping paper draw around the photo then using a ruler measure 1cm out and draw another square around the first one to make a frame.
3. Using the craft knife cut around the larger of the two squares and then cut out the centre of the frame.
4. Position the photo on the front of the card and stick using the permanent glue roller. Use the foam mounting pads to stick the frame at an angle over the top of the photo.
5. To make the pram - Cut out an oval shape from coloured or patterned card and cut out a quarter from the end.

6. You need four circles, two large and two small in different colours to contrast. Stick the smaller circles onto the larger circles and add a bead with PVA glue to the centre of each wheel.
7. To make the baby socks - cut out the shape from coloured or patterned card.
8. Stick the pram and baby socks to the card using foam mounting pads.

#### Handy Tips

- Make sure you have thick card underneath your card when using the craft knife so you don't scratch the surface underneath.
