

Wedding card

Time to make

Difficulty level

Pritt Craft-It is a comprehensive range of adhesives developed specifically for craft projects. Let your imagination run wild and your creative juices flow with the help of Pritt Craft-It. Have Fun!

What you will need:

Pritt products

- Foam Mounting Pads
- PVA Glue

Materials

- Grey card
- Rubber stamp and ink
- Wedding wrapping paper
- Scissors
- Gold/silver beads
- Paper
- Coloured paper

1. Fold grey A4 card in half.

2. In the centre of the card make a print using black ink and a rubber wedding stamp.

3. Taking a piece of wedding wrapping paper, lightly fold in half. On the unpatterned side of the paper draw half of the wedding dress shape and then cut out what you have drawn so you end up with a whole dress when folded back out.

4. Use the same method with the neckline.

5. Use the foam mounting pads to stick the dress and neckline down on the front of the card.

6. Then to finish off make a bouquet of flowers by cutting out strips of card and sticking them together in a fan shape for the base and cut out some flower shapes from a different colour paper and stick them on top.

Handy Tips

- Make a dress template out of card so each time you can simply cut around the template instead of making a new one every time.
